

Child-centred climate change adaptation applying lessons learned

COP 15 Side Event

Tuesday 15 December 2009

09:00 - 10:30 | Bella Center | Victor Borge

Chairing the event is Margareta Wahlström,
Assistant Secretary-General for Disaster Risk Reduction

Children around the world are actively engaged in adapting to climate change and reducing the risk of disasters caused by a changing climate.

We have seen the important role that children can play in protecting themselves and their communities.

Please join the Children in a Changing Climate coalition as we draw on lessons from our work with children and their communities, strengthening their resilience to climate change.
